

COMPOSURE™ PRO

Composure™ Pro is recommended for dogs and cats in need of serious behavioral support, cognitive and brain function support, as well as supporting sleep efficiency.

INGREDIENTS OF INTEREST:

C3™ (Colostrum Calming Complex)

- » C3™ is a patented mixture of bioactive proteins proven to have calming or anxiolytic properties. It contains proline-rich proteins, special monosaccharides, and specific fatty acids that work together to enhance the calming activity of the colostrum fraction. These molecular precursors support the calming response by normalizing cognitive and brain functions that are associated with excessive brain activity.
- » C3™ is produced from a special microfiltration process of certified bovine colostrum. This carefully monitored process assures that the bioactive components are separated and isolated without the application of denaturing heat or physical stressor.

L-Theanine (Suntheanine® Brand)

- » Suntheanine® brand L-Theanine is a patented dietary supplement for stress reduction and relaxation.
- » Clinical trials have shown that Suntheanine® promotes an alert state of relaxation without drowsiness, as indicated by an increase in alpha brain waves and a decrease in beta brain wave activity. Studies have demonstrated that Suntheanine® is effective in helping dogs and cats deal with separation anxiety, fear behavior, and environmental stressors.

Tryptophan

- » Tryptophan is an essential amino acid known for its role in the production of nervous system messengers, especially those related to relaxation, restfulness, and sleep. It is required for the production of serotonin, which is a chemical that acts as a calming agent in the brain and plays a key role in sleep efficiency.
