

Vcheck V2400

Quantitative, In-clinic Results with a High Throughput

Affordable, rapid and proven, Vcheck is the only in-clinic immunofluorescence assay analyzer that captures 12 biomarkers, including Canine NT-proBNP, for the detection of heart disease in just one visit. Vcheck improves patient care by delivering actual quantitative results in minutes, eliminating estimates, ambiguity and the need for reference lab confirmation. Vcheck's V2400 analyzer is an in-clinic, multiple-test analyzer with high throughput for large hospitals and laboratories to complement your point-of-care lab for time-saving diagnosis and faster initiation of treatment plans.

Precise quantitative result

No positives, negatives or estimates

Significant cost savings per test

The most affordable analyzer available

Easy user interface

Optical Character Recognition (OCR) reads handwriting directly from test

Auto-coding system with 2D barcode technology

Randomly accessible without any pre-procedure

Compact yet well-suited to larger clinics and laboratories

Up to 70 tests per hour, 24 tests at once

Available Test Reagents

Cardiac

Detection and monitoring of heart disease in dogs and cats, including MMVD and DCM

- Canine NT-proBNP
- Feline NT-proBNP
- Canine Tnl

Acute Inflammation

Earlier detection of acute inflammation in dogs and cats

- Canine CRP
- Feline SAA

Pancreatitis

Definite diagnosis of Pancreatitis in dogs and cats

- cPL (canine Pancreas-specific Lipase)
- fPL (feline Pancreas-specific Lipase)

Coagulation

Highly sensitive marker for thromboembolism

- Canine D-dimer

Hormones

A hormone marker for Cushing's and Addison's diseases

- Canine Cortisol

A hormone marker for diagnosis of thyroid gland diseases

- T4 (Thyroxine)
- Canine TSH

For determining optimal breeding dates

- Canine Progesterone

Specifications

| | |
|----------------------|--------------------------------------|
| Model | Vcheck V2400 |
| Test capacity | 24 tests at once / 70 tests per hour |
| Power | AC/DC adaptor 120V |
| Display | 10" Color Touch Screen |
| Printer | Built-in |
| Connectivity | HL7 v2.6(PCD-01) / POCT1-A |
| Dimension | 20.0" Wide x 22.0" Deep x 11.6" High |
| Weight | 40.0 lbs |

Simple Testing Procedure

1. Dilute the sample

2. Add diluted sample into a test device

3. Check the test result

| Product Name | Product Number | Product Type | Packing Unit |
|--------------------------|----------------|--------------|--------------|
| Vcheck Canine NT-pro BNP | VCF132DC | Device | 5 Tests/Kit |
| Vcheck Feline NT-pro BNP | VCF130DC | Device | 5 Tests/Kit |
| Vcheck Canine CRP 2.0 | VCF109DD | Device | 10 Tests/Kit |
| Vcheck Feline SAA 2.0 | VCF128DD | Device | 10 Tests/Kit |
| Vcheck cPL 2.0 | VCF129DD | Device | 10 Tests/Kit |
| Vcheck fPL 2.0 | VCF127DD | Device | 10 Tests/Kit |
| Vcheck D-dimer | VCF107DD | Device | 10 Tests/Kit |
| Vcheck cCortisol | VCF105DD | Device | 10 Tests/Kit |
| Vcheck T4 | VCF106DD | Device | 10 Tests/Kit |
| Vcheck Canine TSH | VCF118DC | Device | 5 Tests/Kit |
| Vcheck cProgesterone | VCF122DD | Device | 10 Tests/Kit |
| Vcheck Canine Tnl | VCF137DC | Device | 5 Tests/Kit |
